

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	Statistične metode
Course title:	Statistical methods

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Socialni menedžment (VS) / Social management (BA)	Program nima smeri / Program has a single course	Drugi / Second	Četrti / Fourth
Prva stopnja / First level		Tretji / Third	Šesti / Sixth

Vrsta predmeta / Course type	Izbirni / Elective
------------------------------	--------------------

Univerzitetna koda predmeta / University course code:	SM / SM
---	---------

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
20	0	40	0	0	120	6

Nosilec predmeta / Lecturer:	doc. dr. Nuša Erman / Assist. Prof. Nuša Erman, Ph.D.
------------------------------	---

Jeziki / Languages:	Predavanja / Lectures:	Slovenski / Slovenian, Angleški / English
	Vaje / Tutorial:	Slovenski / Slovenian, Angleški / English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
Ni posebnih pogojev.	No special prerequisites.

Vsebina:	Content (Syllabus outline):
<p>Opisna statistika</p> <ul style="list-style-type: none"> • Osnovni pojmi • Kratek pregled zgodovine statistike • Vrste spremenljivk • Relativna števila • Urejanje in prikazovanje podatkov • Frekvenčna porazdelitev • Kvantili in kvantilni rang • Srednje vrednosti • Mere variabilnosti in asimetrije 	<p>Descriptive statistics</p> <ul style="list-style-type: none"> • General Concepts • Brief history of statistics • Measuring Scales • Relative Numbers • Preparation and Presentation of Data • Frequency Distributions • Percentiles and Percentile Ranks • Measures of central tendency • Measures of Dispersion and Skewness

- Uporaba programskih orodij za podporo pri statistični obdelavi podatkov

- Use of software tools to support the statistical data analysis

Temeljni literatura in viri / Readings:

Macur, M. (2009): *Statistika 1.* Ljubljana; Vega.

Ferligoj, A. (1997): *Osnove statistike na prosojnicah.* Ljubljana; samozaložba.

Pustavrh, S.; Povh J., Vidiček, M. in Govorčin, J. (2011): *Zbirka rešenih nalog iz statistike.* Ljubljana: Vega.

Pfajfar, L. (2011): *Osnovna statistika za ekonomske in poslovne vede.* Ljubljana: Ekonomsko fakulteta.

Triola, F. M. (2004): *Elementary statistics.* Ninth edition. Pearson Education.

Cilji in kompetence:

Pridobitev splošnih kompetenc:

- uporaba metodoloških orodij, tj. izvajanje, koordiniranje in organiziranje raziskav, uporaba raznih raziskovalnih metod in tehnik;
- sposobnost oblikovanja izvirnih idej, konceptov in rešitev določenih problemov;
- sposobnost uporabe relevantnih domačih in mednarodnih virov, uporabe elektronskih virov in kritične analize relevantne literature.

Pridobitev predmetno-specifičnih kompetenc:

- sposobnost za reševanje konkretnih družbenih in delovnih problemov z uporabo družboslovnih znanstvenih metod in postopkov;
- sposobnost pridobivanja, selekcije, ocenjevanja in umeščanja novih informacij in zmožnost interpretacije v kontekstu družboslovja;
- razumevanje in uporaba metod kritične analize in razvoja teorij ter njihova

Objectives and competences:

Acquisition of general competences:

- use of methodological tools, ie. conducting, coordinating and organizing research, using various research methods and techniques;
- ability to formulate original ideas, concepts and solutions to specific problems;
- ability to use relevant domestic and international sources, use electronic resources and critically analyze relevant literature.

Acquisition of course-specific competences:

- ability to solve concrete social and work problems using social science scientific methods and procedures;
- the ability to obtain, select, evaluate and position new information and the ability to interpret it in the context of the social sciences;
- understanding and applying the methods of critical analysis and development of theories and their

<p>uporaba v reševanju konkretnih družbenih in delovnih problemov;</p> <ul style="list-style-type: none"> • sposobnost uporabe informacijsko-komunikacijske tehnologije in sistemov na področju družbenih ved. 	<p>application in solving concrete social and work problems;</p> <ul style="list-style-type: none"> • ability to use information and communication technology and systems in the field of social sciences.
---	---

Predvideni študijski rezultati:	Intended learning outcomes:
<p>Znanje in razumevanje:</p> <ul style="list-style-type: none"> • teoretskih osnov statističnih metod; • praktičnih vidikov statističnega opazovanja družbenih pojavov; • postopka statistične analize; • problema raziskave; • statističnih spremenljivk; • statističnih parametrov in njihova interpretacija; • programske orodij za podporo pri statistični obdelavi podatkov. 	<p>Knowledge and understanding of:</p> <ul style="list-style-type: none"> • theoretical foundations of statistical methods; • practical aspects of statistical observation of social phenomena; • procedures of statistical analysis; • research problem; • statistical variables; • statistical parameters and their interpretation; • software tools to support the statistical data analysis.

Metode poučevanja in učenja:	Learning and teaching methods:
<ul style="list-style-type: none"> • Predavanja z aktivno udeležbo študentov (razlaga, vprašanja, primeri) • Vaje (računsko reševanje konkernih nalog iz statistike, razumevanje logike in interpretacija rezultatov, timsko delo, metode kritičnega mišljenja, sporočanje povratne informacije) • Vaje, ki temeljijo na izkušenskem, sodelovalnem in problemskem učenju (samostojno učenje, diskusija, razlaga, opazovanje, timsko delo) • Laboratorijske vaje (vaje z aktivno udeležbo študentov, delo z računalnikom, seznanitev s programskim orodjem, upoštevanje in razumevanje navodil, samonicitativnost, sposobnost reprodukcije rezultatov, razumevanje in zmožnost interpretiranja dobljenih rezultatov) 	<ul style="list-style-type: none"> • Lectures with the active participation of students (explanation, questions, examples) • Seminars (computation of statistical problems, understanding the logic and interpretation of results, team work, critical thinking, communication feedback) • Seminars based on experiential, collaborative and problem-based learning (self-directed learning, discussion, explanation, observation, teamwork) • Computer Laboratory Seminars (exercises with the active participation of students working with computers, familiarization with the software, consideration and understanding instructions, self-initiative, ability to reproduce results, understanding and ability to interpret the obtained results) • Use of online classroom or other

<ul style="list-style-type: none"> Uporaba spletne učilnice oziroma drugih sodobnih IKT orodij Individualne in/ali skupinske konzultacije (diskusija, dodatna razlaga, obravnava specifičnih vprašanj) Možnost oblikovanje portfolija in samostojen študij (motiviranje, usmerjanje, samoopazovanje, samouravnovanje) 	contemporary ICT tools <ul style="list-style-type: none"> Individual and/or groups consultations (discussion, additional explanation, dealing with specific issues) Possibility of portfolio formation and independent study (motivating, guiding, self-observing, self-tuning, reflection).
--	---

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
<p>Načini:</p> <ul style="list-style-type: none"> Aktivno sodelovanje na vajah in/ali delo v okviru seminarov in individualno Ustni ali pisni izpit <p>Ocenjevalna lestvica – skladno s Pravilnikom o preverjanju in ocenjevanju znanja.</p>	20% 80%	<p>Types:</p> <ul style="list-style-type: none"> Active participation at the lectures and/or work within the seminars and individually Oral or written examination <p>Grading is in accordance with the Faculty's evaluation Ordinance.</p>
