Cilji in kompetence:**Cilji predmeta:**

študentje spoznajo osnove defektologije ter rehabilitacije, osvojijo pravilno terminologijo ter primeren odnos do oseb z različnimi vrstami oviranosti. Usposobijo se za razumevanje vzročnosti in posledičnosti na področju posameznih oviranosti. Seznanijo se z načini obravnave ter oblikami skrbi za osebe z oviranostmi. Spoznajo možnosti za detekcijo, usposabljanje in prevencijo ter prepoznajo pomembnost multidisciplinarnega pristopa pri obravnavi oseb z oviranostmi. Znajo izbrati prave metode in modele za uspešno socialno vključenost oviranih oseb v skupnost.

Objectives and competences:

The objectives of the course:
students learn the basics defectology and rehabilitation, they learn the correct terminology and approaches to dealing with persons with different disabilities. They are trained for understanding of causality and consequences of each type of disability. They get acquainted with different approaches to treatment and care for persons with disabilities and with possibilities for detection and prevention. They recognise the importance of a multidisciplinary approach when treating persons with disabilities. They know which methods and models to use for a successful social integration of disabled persons into society.

<p>Kompetence:</p> <p>Splošne kompetence:</p> <ul style="list-style-type: none"> - poznavanje in razumevanje osnovnih konceptov in metod, seznanjenost z novostmi na področju študija, - sposobnost uporabe znanja v praksi in reševanja problemov, - etična refleksija in zavezanost profesionalni etiki, - kooperativnost, delo v skupini (in v mednarodnem okolju), - občutljivost za raznolikost in družbeno neenakost. <p>Predmetno specifične kompetence:</p> <ul style="list-style-type: none"> - sposobnost argumentiranega ter spoštljivega razpravljanja in reševanja problemov, - zmožnost učenja, strokovnega izpopolnjevanja z visoko stopnjo samostojnosti, - sposobnost zavzemanja kritičnega odnosa do svojega pristopa, presojanja njegovih meja in primerjanja z drugimi alternativnimi pristopi. 	<p>Competences:</p> <p>General competences:</p> <ul style="list-style-type: none"> - understanding of basic concepts and methods, familiarity with innovations in the field of study, - the ability to use acquired knowledge in practice and solving problems, - ethical reflexivity and commitment to professional ethics, - cooperation, working in a group (in international context), - awareness of social inequality and differences. <p>Course-specific competences:</p> <ul style="list-style-type: none"> - the ability of argumentative and respectful discussion and problem solving, - the ability of learning, professional development with a high degree of autonomy, - the ability to be critical of one's own approach, the judgement of its limits and comparison with alternative options.
--	---

<p>Predvideni študijski rezultati:</p> <p>Študenti znajo:</p> <ul style="list-style-type: none"> - demonstrirati znanje in razumevanje s področja rehabilitacije, specialne in socialne pedagogike; - prepoznati »neprimerne« vedenjske odzive uporabnika kot posledico njegove oviranosti v različnih kulturnih okoljih; - vključevati se spoštljivo in zaupno v strokovno komunikacijo z uporabniki, drugimi kolegi in ostalimi člani multidisciplinarnega tima; - demonstrirati zavedanje problemov in postopkov, relevantnih za profesionalno prakso; - konstruktivno sodelovati z drugimi v procesu soustvarjanja možnih (želenih) rešitev; 	<p>Students know how to:</p> <ul style="list-style-type: none"> - demonstrate knowledge and understanding from the field of rehabilitation, special and social pedagogy; - recognise the 'inappropriate' behavioural responses of the user as the consequence of their impairment, while taking into account the cultural background; - include a respectful and confidential professional communication with other colleagues, users and members of the multidisciplinary team; - demonstrate awareness of issues and procedures relevant for professional practice;
---	--

<ul style="list-style-type: none"> - razumeti razliko med prirojeno in pridobljeno oviranostjo ter razliko v pristopu pri obravnavi ene in druge populacije. 	<ul style="list-style-type: none"> - engage constructively with others in the process of co-creation potential (desired) solution; - understand the difference between congenital and acquired impairments and the difference in approach to treatment of both populations.
---	---

Metode poučevanja in učenja:

- predavanja z aktivno udeležbo študentov, seminarska naloga, vaje, individualne naloge, diskusija, igra vlog, študija primera, konzultacije,
- uporaba spletne učilnice oziroma drugih sodobnih IKT orodij.

Learning and teaching methods:

- lectures with active participation of students, seminar work, tutorials, individual assignments, discussion, role play, case study, consultations,
- use of online classroom or other contemporary ICT tools.

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
Ustni izpit Seminarska naloga s poročili vaj ter predstavitev naloge Ocenjevalna lestvica – skladno s Pravilnikom o preverjanju in ocenjevanju znanja.	60 40	Oral Exam Seminar work with reports of tutorials and its presentation Grading scale - in accordance with the Rules of examination and evaluation of knowledge.
